# *Sustainability is* **SustainabITALY**

Green transition and innovation are also affecting airports, that are becoming smarter and more sustainable: airports are rethinking how their infrastructures could be designed and operated to reduce their overall environmental footprint and increase their positive economic impact.

Italian aviation and airport industry is working on the different dimensions of sustainability: economic, social, environmental, governance.

Italian companies, indeed, are involved in:

- qualified training and information programs on different sustainability topics performed by international experts;
- sustainability “assessments” using a tool financed by Horizon2020 funds and provided by the Enterprise Europe Network, a project supported by the EU Commission. The sustainability assessment produces a European benchmarking on current company performance followed by an action plan with suggested initiatives and steps aimed at strengthening the sustainable growth.
- sharing with the National Aviation Agencies (ENAC and ENAV) and the Italian Airports innovative solutions and models to afford jointly the sustainability challenge in the airports.

To support the efforts of the aviation sector in lowering its environmental impact, ITA - Italian Trade Agency is presenting the Italian exhibitors at Dubai Airport Show 2024 with the motto: Sustainability is SustainabITALY.

# Italian Trade Agency - ITA

## TRADE AND INVESTMENT

OPEN DOORS TO A WORLD  
OF OPPORTUNITIES

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy. With a motivated and modern organization and a widespread network of overseas offices, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world.

### FIND YOUR ITALIAN PARTNER

ITA - Italian Trade Agency supports the business development of Italian companies abroad, increases business opportunities, improves the image of 'Made in Italy', promotes industrial collaboration and foreign investment in Italy. Find your Italian partner is a business directory with virtual showcases of Made in Italy companies. We offer you an overview of Italian businesses, including company profiles, products images and details, website, business proposals and contact information. Foreign companies or agent interested in Italian products or looking for partnership with Italian companies, can access the database with the profiles, searchable by sector or product, and find a business partner.

## CALZAVARA - CLAMPACO

Clampco Sistemi, a brand of Calzavara S.p.A., funded in 1989 is leader in the design and production of Aircraft Warning Light Systems (also known as obstruction lights) and Vertipoint/ Heliport lighting systems.

Along with the full range of AWLS Beacons (Low-Medium-High Intensity for Obstacles Day & Night marking) we offer the necessary engineering and support to design a turn-key system.

Thanks to Clampco Sistemi R&D vocation, our NEW Vertipoint lighting products are cutting-edge technology based. The last generation of LEDs selected for our V-TLOF, V-FATO and V-BEACON allow long and trouble-free life of the products.

Today, our solutions serve markets that include airports, heliports, building & construction, telecommunications & broadcast, power lines, as well as specialty applications for oil & gas.

All products are made in Italy, in our branch of Basiliano (UD).

## CIAS Airport Security & Safety

CIAS is an Italian manufacturer which celebrates 50 years in the production of evolved Perimeter Intrusion Detection Systems with Fuzzy Logic analysis. Many International airports are already equipped with CIAS mW barriers and MEMS fence-detection technologies, both for safety purposes to support Ground Radars in traffic control, and for perimeter security to protect from unwanted intrusions.

Our special microwave barrier ERMO 482XPRO-AIR, immune to Radio Frequency Interference normally present in airport environments, is a real lifesaving system to prevent collision between aircraft, signaling runaway incursions on the taxiways especially when the harsh weather conditions are decreasing the visibility from the control tower.

We also offer a turnkey mobile version, the MMD- System for defence of temporary aircraft parking. Our solutions are IP&PoE ready and cybersecurity compliant.

# DATALOGIC SRL

Datalogic has been one of IATA's members, that defined the Standard Label used today in Airports (IATA Resolution 740) and has been chosen to define the Achievable Read Rate of a barcode reading system in real conditions (IATA report dated 23rd January 1995).

Datalogic has always been a Baggage Handling System (BHS) pioneer: the company installed the first Automatic Reading Station for baggage handling in Europe (Milan - Linate, 1984).

Since then, over 870 Datalogic reading systems have been installed in more than 200 airports across 5 continents (including Tokyo, Dubai, Hong Kong, Sidney, Paris, London, Kuala Lumpur, Chicago, and Atlanta), guaranteeing a fast, reliable and efficient service.

## ENAV SPA

We manage air traffic from 45 control towers and four Area Control Centres (ACC) 24/7.

We guarantee safety and efficiency of air navigation services thanks to constantly evolving cutting-edge technology while ensuring environmental sustainability.

ENAV is a stakeholder for the creation of the Single European Sky programme to harmonise air traffic in Europe.

Operational know-how and technological excellence are our strengths, making us a reliable partner and achieving high levels of efficiency and quality, as demonstrated by more than 100 customers around the world who have chosen ENAV.

We are involved in the installation, maintenance and monitoring of air navigation systems and software through our Company Techno Sky.

Thanks to IDS AirNav we develop new Aeronautical Information and communication Management technologies providing complementary solutions and services.

We are involved in the creation of U-Space (the airspace for drones) through D-Flight, providing services dedicated to users of remotely piloted aircraft.

# ENTER MED SRL

EnterMed provides HEELP System aimed to manage properly airport emergency and contingencies.

Currently working in over 30 Airport of Europe and Middle East, HEELP – Handling Easy Emergency and Local Procedure – runs on more levels of coordination:

- Early Warning - Early recognition of the event. If a potential risk is addressed in the initial phase, it is possible to activate proper mitigation procedures.
- Emergency Notification - When the event occurs and it's in progress, it is essential the prompt notification and safe sharing of available information to all departments involved in the emergency plan.
- Crisis Management - An unexpected event can potentially affect the whole company business. HEELP system, proposes adequate check-list on crisis management, in compliance with company regulations and legal requirements.
- Disaster Recovery - Recovering of normal operating conditions is essential for safeguarding the business. The HEELP system manages urgent recovery procedures, according to pre-coded recovery plans.

## EWO SRL

ewo is one of the leading innovators in outdoor lighting, with a focus on three core principles:

- **MASTERING THE SHAPE OF LIGHT:** ewo customizes the form and atmospheric effects of light using in-house developed optics.
- **MASTERING THE BODY OF LIGHT:** ewo luminaires are distinguished by their high-precision craftsmanship, durability, and efficiency.
- **MASTERING THE INTELLIGENCE OF LIGHT:** ewo's luminaires can be controlled by various protocols, accessing smart lighting systems for sustainable solutions.

ewo is the forerunner in the use of LED technology for various sectors like airports, logistics, transport, and sports. The floodlight R--System, now in its fourth generation, showcases their commitment to innovation. It features upgraded AP10 lenses for improved light distribution and a powerful new version of the R2 for brighter output (up to 175 klm), along with the new IP66 remote driver with wider power supply range (up to 400V).

## FIBRE NET SPA

FibreFENCE is the innovative range of fencing systems and gates, developed to meet the most challenging airport needs, in terms of FRANGIBILITY and RADIO-TRANSPARENCY, combined with high mechanical, chemical, UV-rays resistance and, finally, significant running and maintenance cost cutting.

FibreFENCE is a brand of Fibre Net Group, founded in 2000 in Italy, soon becoming a worldwide leader in the design and manufacturing of ground-breaking FRP (Fiber Reinforced Polymer) composite products, mainly used in the construction and in different industry sectors.

Exploiting this extensive experience and knowledge, Fibre Net developed FibreFENCE. Thanks to the exclusive production technology and construction design, our fences ensure full compliance with ICAO standards in terms of security and airport infrastructure design, keeping initial investment very low and reducing maintenance nearly to zero.

Furthermore, they can be tailored to meet the local Civil Aviation Authority to fully comply with national technical specifications, often different from country to country.

## Forte Secur Group

ForteSecurGroup was founded in 2004 by Salvatore Forte, former Colonel of the Carabinieri armed force, and currently Security Manager of large companies and airlines. The HQ and offices are based in the North of Italy, where we have 300 employees and €15 mil. annual revenue. FSG started as a company specialized in security training and today we are the only European player providing integrated security projects exclusively for large companies.

Our business units:

- Consulting and Training Academy
- Security service guards
- Technological security system
- Security Operation Center

ForteSecurGroup is one of the few organizations certified by ENAC (Italian Aviation Authority), qualified for aviation security training and has received many awards. Our Tech Department recently developed the Security&Safety HyperView Project which aims to control and manage the flow of people in airport spaces while guaranteeing social distance analysis in real time, thanks to an innovative Artificial Intelligence-based software.

# MOBIMESH INPIAZZA SRL

inPiazza is the innovative AI-powered Location Analytics and Marketing Automation platform to drive passenger journeys. Leveraging Video, WiFi and BLE sensors, inPiazza collects physical analytics data to study passengers flow and provides digital and location-based touchpoints to engage and communicate with them.

WiFi Engagement is the perfect onboarding tool to engage passengers in a frictionless airport experience and to provide travel information in the right place at the right time.

Proximity marketing provides digital touch points for location-based information and push notifications. Interaction goes beyond the airport with Wallet Passes, enabling push notifications with geofencing and more.

Location Analytics enables real-time data collection on passenger behaviour to monitor the performance of each shop in the terminal, providing a dashboard with relevant metrics.

2Guide indoor navigation solution allows passengers to find the shortest route to shops and services inside terminals with just one click, without the need for a location infrastructure.

## OCEM Airfield

OCEM Airfield is a global leader in the design, development, and production of Airfield Ground Lighting Solutions. From LED Approach, Runway and Taxiway lighting to the most energy efficient power solutions and smart management systems and services.

The company is the preferred airfield partner to well over 1,500 airports on all continents.

The Connected Airport is our innovative vision for airports that entails delivering a true end-to-end approach by re-uniting and connecting all key airside components and delivering the highest degree of efficiency, sustainability, and safety.

Guided by this vision, our products, systems and services further improve an airport's performance from approach, runway, taxiway lighting and power to tower-based traffic control systems and services. It allows for a real-time view on airport operations for easy performance measurement and improvement.

# ONE WORKS

One Works is Italy's leading aviation design and consultancy firm, working together with airport operators and investors across Europe and the Middle East to enhance operations and development. With a commitment to safety, efficiency, and sustainability, we place a strong emphasis on elevating the passenger experience and ensuring the highest quality standards.

With a strong background in airside and landside planning, flow management, and infrastructure design, we work hand-in-hand with operators and stakeholders to develop comprehensive strategies in all areas of airport operations. From developing long-term Masterplanning strategies for managing capacity and commercial value to optimizing existing assets on a tight budget, we work with various types of airports, including global, regional, and low-cost hubs.

# RODECO GROUP

## RODECO GROUP

WE ARE SPECIALISTS IN PAVEMENT EVALUATION AND MANAGEMENT FOR 40 YEARS AROUND THE WORLD

RODECO is involved in Pavement Evaluation and Management Systems using the best non-destructive equipment available in the world.

RO.MA. (Road Management System) developed by RODECO is one of the most advanced PMS to assist the user in making consistent and cost effective decisions on Airport Pavement Maintenance and Rehabilitation.

We developed the new ADE Technology (Automated Distress Evaluation). Our teams will train and support Airports to implement the PMS and to develop the most cost effective strategy for the long term preservation and rehabilitation of their pavements.

WE ARE SPECIALISTS IN PAVEMENT PREVENTIVE MAINTENANCE FOR 20 YEARS  
RODECO has developed new innovative technologies for the Preservation and Preventive Maintenance of Airport pavements, as Rubber Runway Removal, Joint Sealing, Concrete and Asphalt Repair, Innovative Asphalt and Concrete Surfacing for extending the life of the Airport Pavements.

# SITTI

SITTI is a world leader in design, manufacturing and installation of integrated systems for Air Traffic Control (ATC) and Strategic Services.

SYNCRONIS is our portfolio, presenting to the customer a new concept of integration and interoperability of highly technological systems and services. The Voice Communication System (VCS) is the flagship SYNCRONIS portfolio product, being the state-of-the-art, top level, most integrated native Voice-over-IP (VoIP) equipment.

SITTI is today present in most countries with a large base of integrated solutions. The high level of scalability and modularity of SITTI solutions meets all operational and technical requirements, from small towers to ACCs and nation-scaled configurations, wherever reliable integrated and secure communications are required.

THAT VOICE THAT GUIDES YOU. ALWAYS®

SITTI systems integrate the latest technical achievements, in full compliance with latest international standards, allowing coexistence of standard and legacy protocols, analogue and digital, legacy and VoIP and making a “one stop” solution provider.

# SOFTECH

For over 30 years Softech has been supplying systems for monitoring the airport environment. Our product portfolio includes systems for ENVIRONMENTAL MONITORING (noise, air quality, weather, indoor parameters, etc.), FLEET and GSE MANAGEMENT (location and monitoring), management of AIRCRAFT GROUND MOVEMENTS (ADS-B technology) and SMART AIRPORT - IoT solutions.

We offer turnkey solutions complete with hardware, equipment, software and professional services performed by highly qualified specialists: environmental studies, consultancy, system design, installation, maintenance are just a few examples.

All of our systems support third-party equipment, can be customized as needed, and integrated with our community engagement solutions.

With a growing international presence and a strong value proposition also confirmed by our ISO 9001, 14001, 27001 certifications, we are the right partner for your airport.
